

**THE FANTASTIC WORLD OF
THE INTER-CHANGEABLES.**

C.I.E.L.[™] COSMIC INTERSTELLAR EXPLORATION LAB.

INSTRUCTION SHEET

- 1) How to assemble free wheeling rocket jet base.
Insert front wheel, main wheel, side wings and tail wing as shown in the diagram. COSMO-MAN [™] (not included) can be placed into front seat, cockpit or rear seats which has cover that can be opened.
- 2) How to assemble exploration tower
It consists of: A) Base
B) Lower Tower (Shorter)
C) Upper Tower (Longer)
D) Observation Dome
- A) To assemble base
Insert the four feet into round central base.
- B) To assemble lower tower (Shorter part)
Screw the front half and back together with two central bar by means of two screws and nuts on each side. Fix the door on front by press fit plugs. Insert the round cover to the back.
- C) To assemble upper tower (longer part)
Have the same assembling procedure as the lower tower. Press fit the two tubular instrument cover.
- D) To assemble observation dome
Fit the cover onto the control dome. COSMO-MAN [™] (not included) can be put into control dome.

- 3) How to assemble a movable exploration tower
Remove base and press fit whole tower onto jet plane.

Press fit observation dome on top of upper tower, then press fit upper tower to lower tower. The whole tower can stand properly by fitting of the base. You are now having a 12" tall tower. Remove lower tower and insert base to bottom of upper tower. Then you will have a 8½" tall exploration tower. Mount the two movable control arms by fitting plugs to any holes on
